SPEED, ACCURACY AND EFFICIENCY IN EVERY MOVEMENT – FROM GOODS-IN TO FINAL DISPATCH

A warehouse management system from Solarsoft will let you track every SKU and trace every movement. In real-time. Whether you distribute frozen food or sequence automotive parts, we'll help you maintain accurate stock records so you can plan with confidence.

Our WMS will optimise storage allocation and direct movements to help your business grow margins and offer class-leading customer service.

SOLARSOFT'S WAREHOUSE MANAGEMENT SYSTEMS ARE EASY TO USE AND ADAPTABLE, DELIVERING VALUE FROM DAY ONE.

APPLICATIONS

Solarsoft's WMS works across sectors and scales from a few users to large, multi-site configurations:

- Food and Drink
- Pharmaceuticals and Healthcare
- Automotive and Plastics
- FMCG and Hi-Tech
- Merchant and Wholesale

WMS options include 3PL integration, EDI and regulatory reporting.

"WE HAVE REDUCED OUR PICKING TIME BY 25% WITH SOLARSOFT'S WMS

Cutting out paper saves nearly two hours per shift. And the system tracks stock in real-time so our customers can see their orders as they progress.

It's made us much slicker."

Richard Baxter
IT Manager
Stan Robinson

KEY BENEFITS

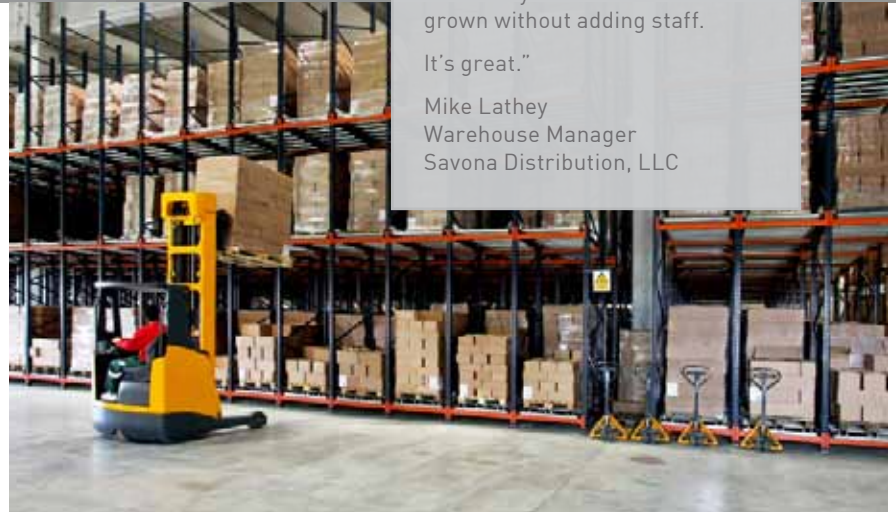

ACCELERATE ORDER FULFILLMENT
CUT ERRORS, RETURNS AND WRITE-OFFS
BOOST PRODUCTIVITY
REDUCE INVENTORY

SPEED AND ACCURACY

Rapid fulfillment and productivity gains of 20% are readily achieved when operators use barcode technology to identify products, containers, batches and storage locations.

What's more, put away and picking errors can be virtually eliminated using scanners in place of paper lists and manual identification.

Need more? Add voice-picking, end-to-end lot control and carrier integration for further gains in productivity and customer service.

"THE BARCODE SYSTEM FROM SOLARSOFT HAS COMPLETELY CHANGED THIS BUSINESS

We used to lose a lot of time looking for pallets. Now we know what's on hand and where it is.

We've extended our shipping window by two hours and we've grown without adding staff.

It's great."

Mike Lathey
Warehouse Manager
Savona Distribution, LLC

END-TO-END VISIBILITY OF EVERY MOVEMENT

- Identify and confirm goods-in
- Label, allocate and directed put away
- Routing for quarantine, cross-dock and returns
- Optimal storage management
- Replenishment
- Perpetual inventory
- Batch/lot and serial number tracking
- Pick planning and task assignment
- Order marshalling and verification
- Documentation
- Carrier integration

The real-time console gives managers visibility of current activity together with key performance measures like pick rates and order backlog.

WORKS WITH YOUR ERP SYSTEM

Our WMS will work with any ERP system*, leaving the back-office software to do what it does best while adding:

- Serial number and batch/lot traceability
- Directed put away and bin management
- Dispatch notifications
- Integration with carriers and 3PLs

Working with Solarsoft to enhance the efficiency of your warehouse operations is easy. Our consultants have experience across industries and will ensure you get the maximum return on your warehouse investment.

Call us today to get a copy of our WMS Worksheet and calculate the benefits you can expect with a warehouse management system from Solarsoft.

EFFICIENCY

Solarsoft's WMS will increase your warehouse capacity by optimising movements and making efficient use of storage locations.

What's more, with accurate stock and batch records you can trim inventory and avoid write-downs while actually increasing from-stock fulfillment.

A Solarsoft WMS will quickly earn its keep as an essential tool for effective warehouse management.
